[WE GUARANTEE—That every tree and plant in this catalogue is honestly described, To please you in every way, To deliver all merchandise safely and To save you money.]

Troy

Ohio

INTRODUCTORY

and

GENERAL DIRECTIONS TO OUR FRIENDS AND CUSTOMERS

It is our sincere desire that this catalog will aid you in making your home surroundings more beautiful and fruitful. In it we have described the many fine trees and plants we can supply that will help you create an attractive and remunerative setting of growing things about your home. There is a tremendous satisfaction in knowing that your outdoor decorations give unmistakable evidence of good taste, culture and refinement, and few are the things that pay such great and continuous dividends in genuine pleasure as well planted home grounds, for

IT'S NOT A HOME UNTIL IT'S PLANTED

Nor is it a complete home until there is an outdoor living room added. Its place is in the rear yard. Plant beautiful trees, shrubs and evergreens to make the walls which set the room apart and screen it from prying eyes. Then locate a few trees for comfortable shade and fruit. Plant hardy perennials along the borders to add delightful fragrance and color. Here the whole family can gather to enjoy the pleasure of outdoor life.

DON'T NEGLECT THE PLANTING OF FRUIT TREES AND BERRY PLANTS

It is a regrettable fact that home grown fruit and berries are fast disappearing. That which can be purchased at the grocery is high in price, and it never tastes as fine as that picked from your own trees and plants when they have sunripened to their fullest perfection.

We are not open for business on Sunday. Our business hours are 6:30 A. M. to 5:30 P. M. all other days of the week, including Saturday. Many of our customers are busy during these hours, so by special previous arrangement the Troy Nurseries will be open any evening that suits your convenience.

GUARANTEE

We guarantee all goods to reach you in good condition. Mistakes if made will be promptly rectified. Trees and plants are living things, and, the same as man, are liable to disease, or may die through lack of proper nourishment. If any stock dies within ninety days after you receive it we will assume one-half the responsibility and replace it at one-half purchase price.

HOW TO ORDER

Make out your order on the order blank you will find enclosed and mail it to us in our self addressed envelope. Write or print very plainly your name and full address. If you write a letter with your order please use a separate piece of paper. Be sure to note that in many varieties offered in both Ornamental and Fruit you get a very liberal discount when you take two of a variety.

Prices quoted are F. O. B. Troy. If you are within driving distance of Troy

it will pay you to call at the Nurseries and take your stock home yourself and eliminate transportation charges.

The ordinary sized order should be shipped by express, unless it is Evergreens, which are dug and packed with a ball of earth left on the roots. Owing to their weight Evergreens should be shipped by freight. If you are located where you can get electric freight delivery instruct shipments to be made this way, because of quick, cheap delivery. Small packages can be shipped by mail, so if you order by mail add 10 cents to each dollar's worth of stock purchased, which will pay postage and other extra expense. We cannot ship anything larger than 2 to 3 ft. size by mail. Be sure to instruct us how to ship.

REMITTANCES should be made by draft, money order or check. C. O. D. orders will be accepted.

Planting instructions will come to you along with your stock. Follow these instructions and success is sure.

SPRING--SUMMER--AUTUMN--WINTER A Full Year's Beauty In Troy Nurseries' Evergreens

This is the age of color. Brilliant harmonies in home decoration are the vogue everywhere. Troy Nurseries' Evergreens are year-round inspirations, full of captivating charm, that lend character to the best architecture, and their true value can only be measured in terms of enduring beauty.

Every variety has individuality in both color and shape. No other plant material makes possible such artistic plantings or such lovely color effects.

Evergreens must be dug with a ball of earth left on the roots, for if the roots are exposed to the air and sun for any length of time the resin, which is the sap of the evergreens, hardens, and when this happens the plant's circulatory system is ruined and it will die.

Balled Evergreens are heavy. A plant 2 feet high will weigh 30 pounds, and they can only safely be shipped in strong heavy boxes, in which the foliage will not be injured or the dirt loosened from the roots. Packing evergreens for shipment is one of our heavy items of expense. If you can come to the Nursery for your evergreens we will be able to eliminate this heavy crating cost and can sell them to you cheaper. All evergreens sold at the Nursery and taken away by the customer will be priced at a discount of 15 per cent from the printed prices after each variety.

Evergreens cannot be shipped by parcel post. If ordered by express the transportation charges are high.

ARBORVITAE TYPES

AMERICAN — Erect, pyramidal habit with soft bright green foliage. Can be trimmed at will. Plant in front of porch columns or anywhere you need a high growing good foliage plant. 2 to 3 ft. \$2.50; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.00.

BERKMAN'S GOLDEN (Biota Aurea Nana)—Without doubt the showiest of all evergreens. Its summer dress is a fresh bright yellow overlaying a dark green;

in winter the outer foliage turns a distinct coppery orange. Compact, slow growing, dwarf pyramid; the flattened foliage faces outward edgewise, presenting a beautiful surface of vertical fluted lines. Use it for edging or for individual planting. 12 to 15 in., \$2.50; 15 to 18 in., \$3.50.

BIOTA COMPACTA—An exact duplicate of Berkman's, except that the foliage is bright green the year around. 18 to 24 in., \$3.50.

DOUGLAS GOLDEN — Broad, bushy pyramid. Foliage decidedly golden, which is best displayed when planted with a background of bright green plants. You do not want an entire planting of yellow foliage plants, but one or two add a note of contrast that is very pleasing. 18 to 24 in., \$2.25; 2 to 3 ft., \$3.00.

ELLWANGERIANA—Low, broad plant with bluish-green feathery foliage. Three of these grouped around one American Arborvitae (described above) make a beautiful inexpensive corner of the porch planting. 12 to 15 in., \$1.00; 15 to 18 in., \$1.25; 18 to 24 in., \$1.75; 24 to 30 in., \$2.25.

ERICOIDES — Another dwarf growing feathery foliage plant; deep green in summer, bronze in winter. Color contrasts nicely with Siberian Arborvitae and should be planted in front of it. 12 to 15 in., plants, 75c cents.

ORIENTALIS— Broad pyramidal plant from Asia. Color refreshing green in summer, turning bronzy green in winter. If laying out a bed in the corner of the yard set this at the back, where its upright growth can assert itself, and it will make a very interesting background in front of which to plant more dwarf growing evergreens or flowering shrubs. 2 to 3 ft., \$2.50; 3 to 4 ft., \$3.00.

PYRAMIDALIS—Dense columnar type, deep green the year around. The most popular and most widely planted evergreen, which has a place of importance in almost every planting. Plant single specimens at each side of porch entrance and in front of porch columns, or use as the back high growing central plant in front of which to group more dwarf growing varieties. 2 to 3 ft., \$3.00 each; two for \$5.00; 3 to 4 ft., \$4.00 each, two for \$7.00; 4 to 5 ft., \$6.00 each, two for \$10.50.

Arborvitae Pyramidalis

Arborvitae Siberian

SIBERIAN—Conical in outline, densely covered with dark green foliage, very different from all other types. The name was given to it because it is so rugged. Use when you require a dense bushy growth in the border planting, or between Pyramidalis and American along the foundation wall and behind Woodward Globe and Sabina Juniper. 15 to 18 in., \$1.50; 18 to 24 in., \$2.25; 24 to 30 in., \$3.00.

WOODWARD GLOBE—The best globe formed dwarf growing evergreen. Hold natural globe shape with no trimming. Foliage dense, deep sea green. Especially fine for low borders, for edging high growing plants along the foundation, for planting in urns, or on each side of walk entrance. 12 to 15 in., \$2.00; 18 to 24 in., \$3.00.

BOXWOOD

Mostly used for planting in tubs or boxes, but are excellent for setting in the foundation planting where a medium growing plant is desired. 12 to 15 in., \$1.50 each, two for \$2.50; 15 to 18 in., \$2.00 each, two for \$3.50; 18 to 21 in., \$2.50 each, two for \$4.50.

Juniper Sabina

HEMLOCK

We have just a few of these. One of the best evergreens for shady places, because its close set, dark lustrous, lacy, gracefully drooping foliage, takes on just as good a deep green color there as if planted in full sunlight. Plant it in the background in the border planting, or in front of porch columns. 2 to 3 ft. \$4.00.

JUNIPERS

CANADENSIS — Dense, grayish green spreading type, especially valuable for rocky plantings and for ground cover. 2 to 2½ ft. spread, \$3.00.

PFITZERIANA — A most popular plant, and rightly so. Its branches spread out in all directions and are slightly drooping, laying close to the ground. The foliage is grey green both summer and winter. In the corner of the yard or border planting set it to the front; in the foundation planting it rightfully belongs between high growing plants. 2 to 2½ ft. spread, \$4.00, 2½ to 3 ft. spread \$5.00.

ROSEDALE — Slender columnar type. Fine, soft foliage of pleasing bluish-green. One of those plants whose color contrasts beautifully with either the greens or yellows of other plants. In the foundation planting can be kept to any desired height by pruning. If planted in the open border and allowed to grow naturally can be used in the background. 12 to 15 in., \$1.25, 15 to 18 in., \$1.50; 18 to 24 in., \$2.00.

SABINA — Branches are spreading, dense thickly covered with branchlets heavily clothed with short tufted dark green foliage that holds the one color throughout the year. An excellent border plant for either foundation plantings or open yard plantings. 15 to 18 in., \$2.00; 18 to 24 in., \$2.50; 2 to 2½ ft., \$3.50.

MAHONIA

A beautiful evergreen shrub, with smooth shining holly leaves; bright yellow flower clusters in May, followed by large blue berries. The leaf color varies through the year at times, being painted with red and bronze. Group them in front of tall growing evergreens. 12 in. plants, \$1.00.

RETINOSPORAS

PISIFERA — Upright growth with drooping branches. Foliage is feathery, light green, bluish beneath. Plant in front of porch columns, with Siberian Arborvitae between them and Sabina Juniper in front. 2 to 3 ft. \$3.00, 3 to 4 ft., \$4.00; 4 to 4½ ft., \$4.50.

PLUMOSA — Pyramidal in habit of growth, with billowy, light green foliage. This variety, along with a Pyramidalis Arborvitae and a Berkman's Golden, makes an excellent planting for each side of the entrance. 2 to 3 ft., \$3.00.

YUCCA FILAMENTOSA

(Spanish Bayonet)

A Perennial with evergreen sword like foliage, and in midsummer producing great erect branching stems bearing showy pendant cream white flowers. Excellent for planting along with evergreens. Heavy 2 yr. plants 30c each, three for 80c.

Yucca Filamentosa

TROY NURSERIES' SHRUBS

We do not recommend many of the varieties of shrubs that you will find listed in some nursery catalogs, because many of these varieties that are offered for sale will not prove satisfactory to the purchaser. Some of them are semi-hardy, some only belong in the swamps and back country where they came from, while others require much expert care with which the amateur planter cannot be familiar.

Select your shrubs for the decoration of your yard from the following pages and you can be sure that they are hardy, that they will bloom profusely, that they will have all season decorative foliage and will make good growth.

Troy Nurseries' Shrubs are carefully grown. They are full of vigorous life and will generously reward the planter. Tastefully arranged around the foundation of the home or along the borders of the yard they will present alluring color combinations of enduring beauty. And Troy Nurseries' Shrubs are so very reasonable in price that every home can have them.

ABELIA GRANDIFLORA—An attractive dwarf shrub, suitable for a sunny, sheltered position. Has small shiny foliage almost evergreen. Flowers very numerous in loose terminal panicles. Color white, blushed pink. Rarely without bloom from June to November. 2 yr. plants 65c each, two for \$1.20.

ALMONDS — Covered with beautiful double flowers in early spring before the

Althea

leaves appear. 2 to 3 ft. plants in either Pink or White flowering at 60c each, or one of each color, \$1.10.

ALTHEA (Rose of Sharon)—August and September blooming, when few other plants are flowering. Hibiscus like flowers. We offer them in Pink, Purple, Red or White flowering. 2 to 3 ft. plants in any color you select at 35c each, two of one color, 65c, one of each color, \$1.20.

ARALIA PENTAPHYLLA—Bushy intensely green foliage. Excellent for shady locations. 2 to 3 ft. plants, 50c each, two for 90c.

BARBERRY THUNBERGI (Japanese Barberry)—Beautiful all the year around. In early spring the leaves are a soft shade of green. In the fall they take on shades of crimson and bronze. To give still more color the branches carry a multitude of scarlet berries during the winter. Equally desirable for foundation plantings and hedges.

BARBERRY PRICES

	Each	10	100
12 to 18 inch	25c	\$2.00	\$15.00
18 to 24 inch	30c	2.50	20.00
24 to 30 inch	40c	3.50	30.00

BARBERRY RED LEAF—An important recent introduction among shrubs, giving us for the first time a medium growing shrub with good distinct red foliage. A sunny exposure is necessary to bring out and retain its full red color. 10 to 12 in. plants 50c each, five for \$2.00; 12 to 15 in. plants 60c each; five for \$2.50.

Almonds

Cornus Siberica

BUTTERFLY BUSH (Summer Lilac, Buddleia)—Quick bushy growth. The lovely lilac-like lavender flower spikes begin appearing in July, are 3 inches in diameter and 10 inches long. Blooms until frost if old blooms are trimmed from plant. Delightfully perfumed. 2 yr. plants 35c each, two for 65c.

CALYCANTHUS — The sweet scented shrub of grandmother's garden. 18 to 24 in. plants at 75c each.

GERCIS CANADENSIS—Our native Red Bud. Ideal for planting behind medium growing shrubs, as its delicate pink blossoms in early spring present a charming contrast to the tender greens and bronzes of young foliage. 2 to 3 ft. plants 60c; 3 to 4 ft. plants 75c.

CLETHRA ALNIFOLIA (Sweet Pepper Bush)—Handsome little plant delightfully fragrant in August when covered with long showy wands of creamy white flowers. 18 to 24 in. plants 60c.

CORNUS ELEGANTISSIMA—Its beautifully variegated green and white leaves add a distinct charm to any foundation planting. Ideal for planting behind barberry. 2 to 3 ft. plants 60c each, two for \$1.10. Two plants in the average foundation planting will give the desired effect.

CORNUS LUTEA—A striking yellow barked shrub that is very decorative in

winter and is a beautiful plant in summer, having good green foliage and white flowers. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants, 50c each.

CORNUS SIBERICA—Ideal screening plant growing 6 to 10 ft. high, dense growth, good foliage, large white flowers, fall crop of white berries, branches dark red. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

CYDONIA JAPONICA (Japan Quince)—This fine old shrub in early spring is completely covered with dazzling scarlet flowers. Often called Fire Bush. 18 to 24 in. plants 50c each; two for 90c; 2 to 3 ft. plants, 60c each.

DEUTZIA CRENATA — Tall growing, dainty bell shaped white flowers completely covering it in June. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

DEUTZIA GRACILIS — Very dwarf growing, its drooping branches wreathed with pure white bell-like flowers in May. An excellent edging shrub. 10 to 12 in. plants 35c each, two for 65c; 12 to 15 inch plants 45c each.

DEUTZIA LEMOINEI—Medium growing, flowers borne in large cone-like clusters. Blooms well even if grown in partial shade. Ideal for foundation planting. We consider this the best of all the deutzias. 18 to 24 in. plants 35c each, two for 65c; 2 to 3 ft. plants 45c each.

DEUTZIA PRIDE OF ROCHESTER—Tall growing, double white flowers in May. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

Deutzia Lemoinei

Forsythia Intermedia

ELDER CUT LEAF — Produces great handsome cones of delicate white flowers in June and July, but its foliage being most exquisitely shaped, is what makes it so desirable. 3 to 4 ft. plants 50c each, two for 90c; 4 to 5 ft. plants 60c each.

ELDER GOLDEN LEAF — Its yellow leaves contrast beautifully with the greens of other plants. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

EUONYMOUS ALATUS (Winged Burning Bush)—Has curious corky bark and winged branches. A fine shrub for solitary planting, as well as for massing with other shrubs. Leaves rich crimson in autumn. 15 to 18 in. plants 60c each.

FORSYTHIA FORTUNEI (Upright Golden Bell)—Tall growing; brightens all plantings with its glinting mass of yellow flowers in early spring. 2 to 3 ft. plants, 40c each, two for 75c; 3 to 4 ft. plants 50c each.

FORSYTHIA INTERMEDIA (Half Drooping Golden Bell)—Blooms very early and profusely. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

FORSYTHIA VIRIDISSIMA—Upright growing; olive green leaves that change to bronze in winter. Flowers greenish yellow. 2 to 3 ft. plants 40c each; two for 75c.

HONEYSUCKLE FRAGRANTISSIMA—Evergreen if in sheltered position. Willowy branches. Clusters of tiny Pink and White flowers very sweetly scented. 2 to 3 ft. plants 40c each, two for 75c.

HONEYSUCKLE MORROWI—Dense spreading habit; excellent for back yard screens. Flowers cream white followed by blood red berries that present the most thrilling spectacle among summer fruiting

shrubs. 2 to 3 ft. plants 40c each; two for 75c; 3 to 4 ft. plants 50c each.

HONEYSUCKLE TARTARIAN PINK

—Upright, shapely growth, light crimson flowers in early summer. Plant in the yard border or along foundation where a rather high growing plant is desired. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

HONEYSUCKLE TARTARIAN WHITE

—Same habits as Tartarian Pink. Bloom white. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

HYDRANGEA ARBORESCENS GRANDIFLORA (Hills of Snow)

—Fine deep green foliage, large white flowers. 18 to 24 in. plants 50c each, two for 90c each; 2 to 3 ft. plants 50c each.

HYDRANGEA PANICULATA GRANDIFLORA

—Wonderfully attractive when laden with their massive plume-like flowers in August and September. Flowers come out white and change to pink. Planted between other shrubs the large bloom heads are very conspicuous and effective. 18 to 24 in. plants 40c each, two for 75c; 2 to 3 ft. plants 50c each.

HYPERICUM (St. Johns Wort)—This excellent shrub blooms continually from June to September. Golden yellow tufted flowers, willowy foliage, medium growing. 2 to 3 ft. plants, 50c each.

KERRIA JAPONICA—Handsome green leaved; graceful drooping green barked branches covered with a wealth of dark yellow buttercup flowers in June. 2 to 3 ft. plants 60c each.

KOLKWITZIA AMABILIS (Beauty Bush)—A new flowering shrub from China, which is destined to be one of the most popular plants in the garden. It

Hydrangea, P. G.

grows 6 to 8 ft. high and as much in width, producing long arching branches covered in spring with clusters of small, tubular flowers borne in such profusion that the bush becomes a perfect cloud of delicate pink. So far very few of these have been sold by any nurseryman. Be the first to have one in your neighborhood. \$1.00 each.

LILAC PURPLE — The old fashioned sweet scented purple lilac enriches any home ground. 2 to 3 ft. plants 50c each, two for 90c; 3 to 4 ft. plants 60c each.

LILAC WHITE—2 to 3 ft. plants 60c each.

LILAC PERSIAN PURPLE—Slender drooping branches covered in May and June with lavender flowers borne in loose panicles. 2 to 3 ft. plants 60c each.

Philadelphus Coronarius

FIVE FAMOUS FRENCH HYBRID LILACS

Marvels of beauty and elegance, perfected flower types in size, form, freedom of bloom and color. Grown in tree form.

Varieties and colors

Belle De Nancy—Pink.

Chas. X—Red.

Madam Abel Chatney—White.

President Grevy—Blue.

Any one of the above Lilacs at \$1.25, or group of four at \$4.00.

PHILADELPHUS AUREA (Golden Syringa)—The best Golden Leaved dwarf shrub. An ideal plant to set in front of the Honeysuckles, Hydrangeas or Spiraeas. We have a fine stock of these. 15 to 18 in. plants 50c each; 18 to 24 in. plants 60c each; 2 to 2½ ft. plants, \$1.00 each.

Lilac Purple

PHILADELPHUS CORONARIUS (Mock Orange) — Tall growing, large white sweetly scented flowers in May. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

PHILADELPHUS GRANDIFLORA — Very tall growing and heavy flowering. Excellent for screen work. 2 to 3 ft. plants 40c each (two for 75c); 3 to 4 ft. plants 50c each.

PHILADELPHUS VIRGINALIS — A fine new variety. Moderately tall with good foliage and compact habit. Flowers are the largest, handsomest and most sweetly scented and longest blooming variety. 2 to 3 ft. plants 60c each.

PRUNUS PISSARDI— Dwarf tree-like shrub, with showy reddish purple leaves throughout the summer and white flowers in spring. Plant with high growing shrubs for foliage contrast. 3 to 4 ft. plants 75c each, 4 to 5 ft. plants \$1.00 each.

SNOWBERRY RED — Fine for shady places. Red berries in fall. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

SNOWBERRY WHITE—Does fine in both shade and sun. Pinkish flowers in July, white berries in September. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants 50c each.

SPIREA ANTHONY WATERER — Dense, round growth. Large clusters of brilliant rose-carmine flowers, at its best in mid-summer. Ideal for foundation planting, or anywhere that very dwarf plants are required. 12 to 15 in. plants 30c each, 15 to 18 in. plants 40c each, two for 75c.

SPIREA BILLARDI— Upright growth surmounted with dense spikes of rose-pink

flowers. Grows 4 to 5 ft. high. 2 to 3 ft. plants 40c each; two for 75c.

SPIREA CALLOSA ALBA — Grows same as Spirea Anthony Waterer, blooming white; good to plant with it. 15 to 18 in. plants 40c each, two for 75c.

SPIREA FROEBELI—Semi-dwarf, covered with bright crimson flowers in dense corymbs in July and August. 15 to 18 in. plants 40c each, two for 75c; 18 to 24 in. plants 50c each.

SPIREA OPULIFOLIA — Growth upright, attaining 8 feet. Heavy white flower umbels in June make branches droop. Old flowers change to red, making a striking variety of color at different stages of development. 3 to 4 ft. plants 40c each, two for 75c.

SPIREA PRUNIFOLIA — Plum leaf spirea. Foliage turns brilliant red in autumn. Blooms very early. Small white double flowers. 2 to 3 ft. plants 50c each, two for 90c.

SPIREA THUNBERGI — Semi-dwarf, fluffy, willow-like charming green foliage; flowers white in March. 18 to 24 in. plants 40c each, two for 75c; 2 to 3 ft. plants 50c each.

SPIREA VAN HOUTTE—Height 5 to 6 feet; stands shade. Indispensable in any group of shrubbery, where its graceful, arching branches can be left unpruned. A complete fountain of pure white in May and June. Leaves rich, dark green from spring to fall. 2 to 3 ft. plants 40c each, two for 75c; 3 to 4 ft. plants, 50c each.

Spirea Anthony Waterer

Viburnum Plicatum

STEPHANANDRA FLEXUOSA — A shade loving shrub coming from Korea. Angular spreading, zig-zag branches. Finely cut foliage, flowers white. 2 yr. plants 50c each.

TAMARIX AFRICANA—Grows 8 feet high; has fine, feathery, bright green foliage, pink flowers in long terminal panicles. Splendid for planting behind lower growing shrubs. 3 to 4 ft. plants 50c each, two for 90c.

VIBURNUM AMERICAN (High Bush Cranberry) — Handsome, dense, bright green foliage. Broad white flower corymbs in June, followed by bright scarlet berries that stick on through the winter. 2 to 3 ft. plants 65c each, two for \$1.20; 3 to 4 ft. plants 75c each.

VIBURNUM LANTANA—High growing, beautifully wrinkled silver green foliage. White flowers in May. 2 to 3 ft. plants 50c each, two for 90c.

VIBURNUM OPULUS (European Cranberry)—High growing. Most highly prized for its large bunches of crimson berries. 2 to 3 ft. plants 60c each, two for \$1.10.

VIBURNUM OPULUS STERILIS (Snowball)—The well known Snowball, which is always in bloom at Decoration Day time. 2 to 3 ft. plants 65c each, two for \$1.20; 3 to 4 ft. plants 75c each.

VIBURNUM PLICATUM (Japan Snowball)—Erect, compact growing. Purple tinged foliage of beautiful pattern. Globular flowers of purest white. A plant that the passerby will stop to look at in any season of the year. 2 to 3 ft. plants, 75c each, two for \$1.40.

WEIGELA EVA RATHKE—The very much sought after red flowering Weigela. A medium compact grower, pretty when not in flower, but when its rich red blossoms cover it, it becomes one of the out-standing plants in the yard. 2 to 3 ft. plants 60c each, two for \$1.10.

WEIGELA ROSEA—The most widely planted of all Weigelas. Its rich pink bell-shaped flowers are clustered along its arching branches so thickly that the foliage is practically covered up. 2 to 3 ft. plants 50c each, two for 90c; 3 to 4 ft. plants, 60c each.

WEIGELA VARIEGATED—Its leaves are broadly margined cream white; flowers pink, dwarf growing. Very useful, as its variegated leaves stand out prominently among other plants. 18 to 24 in. plants 50c each, two for 90c.

WILLOW, PUSSY—Not a tree, but a shrub. Plant for winter bouquets. If the branches are cut off and placed in a vase of water the dainty silvery catkins unfold in early February. 3 to 4 ft. plants 40c each, two for 75c.

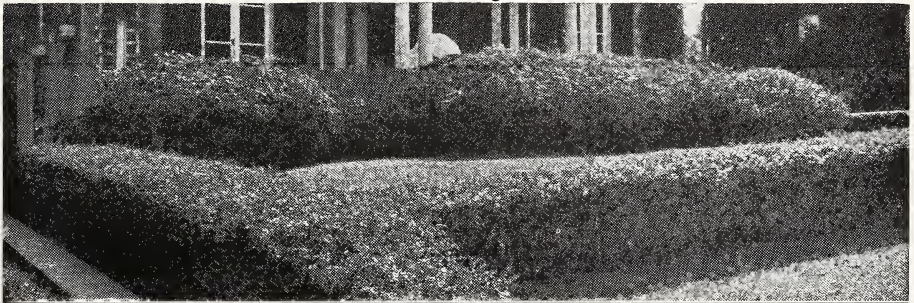

WILLOW ROSEMARY—A tall growing silver leaved shrub that is ideal for planting back of other shrubs. 2 to 3 ft. plants 40c each, 3 to 4 ft. plants, 50c each.

Pussy Willow

Troy Nurseries' Hedge Plants

Are well developed and evenly graded. Plant all hedge plants 12 inches apart and you can develop a compact impassable living fence of the richest beauty, whose usefulness will endure indefinitely.

Amoor River Hedge

PRIVET AMOOR RIVER — Forms a dense dark green upright hedge. Can be trimmed to any desirable height and shape. We cannot recommend this variety too highly. 15 to 18 in. plants \$8.00 per 100; 18 to 24 in. plants \$10.00 per 100; 2 to 3 ft. plants, \$12.50 per 100.

PRIVET IBOTA—Makes up into striking informal screening hedge with wide spreading curving branches, or can be shaped as desired by trimming. 15 to 18 in. plants \$8.00 per 100; 18 to 24 in. plants \$10.00 per 100; 2 to 3 ft. plants \$12.50 per 100.

PRIVET CALIFORNIA — Is a quick growing dark shiny green. Handsomest of all hedges, but unfortunately occasion-

ally freezes back to the ground. 18 to 24 in. plants \$6.50 per 100; 2 to 3 ft. plants \$8.50 per 100.

JAPANESE BARBERRY—The best low growing hedge. Fine for bordering walks and drives, or edging for shrubbery groups. Branches studded with crimson fruit in winter.

(For prices see page 6).

Base your selection of yard boundary markings on ultimate beauty, as well as protection from intrusion. Mark your property lines with a living fence. If you want a high growing hedge use Privet, if a dwarf hedge use Barberry.

Troy Nurseries' Sure-to-Bloom Bush Roses

Troy Nurseries' Roses embrace the most exquisite varieties, marvelous in form and color. One cannot describe or illustrate them perfectly. We highly recommend them to you if you desire choice flowers for cutting throughout the summer. Plant a dozen of them and their flowers will rival the rainbow this year, as well as succeeding years.

Our Roses are all two years old and outdoor grown. They are far superior to greenhouse grown roses and will bloom much more profusely.

PRICES OF BUSH TYPE ROSES

70 cents each; 2 of one variety, \$1.35; 5, your selection of varieties, \$3.25, 5 of one variety, \$3.00.

AMERICAN BEAUTY—The fame of the American Beauty is nation wide. The rich glowing deep pink flowers are of immense size, exquisite form and delightfully fragrant, borne on extra heavy long stiff stems.

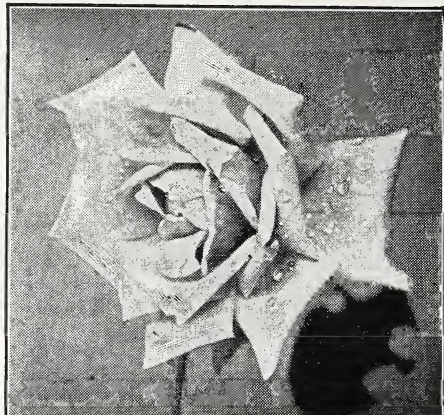

COLUMBIA—Blooms all the time. Color deep peach pink, fragrant beyond description. A full double rose borne on almost thornless stems. One of the greatest of outdoor roses.

DUCHESS OF WELLINGTON—A low spreading vigorous grower, with long saffron yellow buds opening to very large light yellow flowers. Very popular.

ETOILE DE FRANCE—Velvety garnet red cup, with center of vivid cerise. Full flower and heavy bloomer.

FRANCIS SCOTT KEY—A magnificent rose named in honor of the author of "The Star Spangled Banner." Color, glowing scarlet with darker shadings. Bud long and pointed, opening full and double on long upright stems.

FRAU KARL DRUSCHKI—The great White American Beauty. Best known

Killarney, Pink

white rose. Exquisite in bud, charming in half open state, distinctive when fully open.

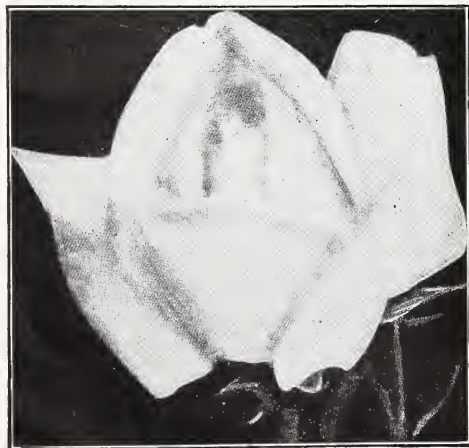

GENERAL JACQUEMINOT — One of the finest of the June roses. Crimson-scarlet, very fragrant, large and full.

GRUSS AN TEPLITZ — The intense dazzling color of this rose is found in no other variety. Fiery crimson, shaded with dark velvety sheen. Large, handsome, moderately double. Blooms all summer long. Incomparable for fragrance.

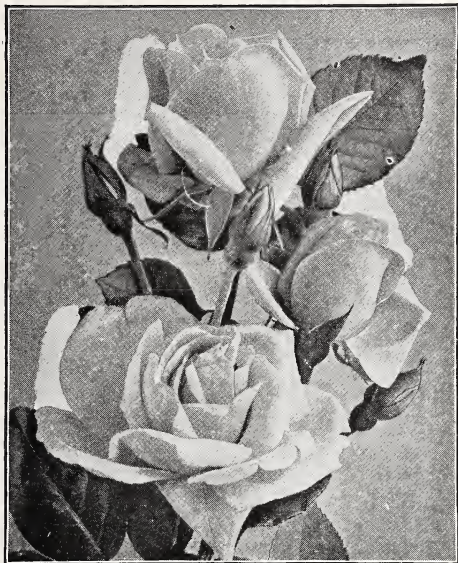

J. L. MOCK—Flowers enormous, magnificently formed, deep and double, very sweetly perfumed. Bright rich pink faced with carmine. A wonderful hardy Garden Rose. An all season bloomer.

K. A. VICTORIA—The greatest hardy Hybrid Tea rose in existence. A free flowering sturdy grower, flowering continuously from early summer until late fall. Pointed buds, large double flowers glorious in their perfection, delicate pure white, deliciously fragrant. Long stiff stems.

KILLARNEY PINK—Strong, sturdy and upright, with fine, heavy insect-proof foliage; heavy flowers that are simply exquisite in form and color. The buds are exceedingly long and the flowers immense in size; color deep, brilliant, sparkling shell-pink. Bears its beautiful burden of flowers constantly all summer.

Frau Karl Druschki

Madame Butterfly

KILLARNEY WHITE—Identical with Pink Killarney except in color, which is glistening white. Its great charm lies in the beautiful shape of its buds.

LADY HILLINGDON — One of the charming new roses. Color beyond description, apricot yellow, shaded with orange on outer edge of petals, becoming deeper and more intense toward the center of the flower. Produced on long wiry stems well above foliage, giving graceful effect.

LOS ANGELES—Vigorous growing, producing in continuous succession during the growing season strong shoots, each bearing an enormous flower of a luminous flame pink, toned with coral and shaded with translucent gold at the base. Very fragrant.

MADAME BUTTERFLY—Fast becoming one of the most popular roses in cultivation. If you can imagine exquisitely formed buds of Indian Ochre, with yellow at the base and those intermediate tones of clear brilliant shade of coral pink, opening into deep, full and double flowers. Add to this delicious fragrance and continuous blooming, and what more can you ask?

MADAME CAROLINE TESTOUT—Satiny rose, deepening at center to cherry red. Excellent all season bloomer.

MRS. AARON WARD—Very distinct coppery orange in bud, golden orange when partly open, and pinkish fawn when fully open. Flowers splendid in form, always blooming, exquisitely scented.

MRS. AMBROSE RICARDO— Enormous incurved flowers of fine peach-yellow shaded with pink. A heavy long season bloomer and one of the finest for cutting.

MRS. JOHN LAING—Color clear, bright shining pink, cup shaped, very fragrant. The mistress of the garden in June.

PAUL NEYRON—Blooms intermittently from June to November, on long, smooth thornless stems, furnishing a vast quantity of uniform flowers 4 to 5 inches across. Color, bright ruddy pink.

PINK RADIANCE— Just as its name suggests, radiantly beautiful, bright carmine-rose, with opal and coppery reflections. Wonderfully formed flowers, immense size, exquisite fragrance, grand foliage, healthy growth. Always in bloom.

PREMIER—Gorgeous in form, full and double, deliciously fragrant. Deep rose-pink almost crimson. A most magnificent rose produced on long stiff almost thornless stems. Flowers continuously throughout the season.

RED RADIANCE—Form of bloom and growth of plant identical with Pink Radiance. Color a splendid even shade of clear red without a trace of any other color. Retains its vividness for an unusually long time after being cut.

SOUVENIR DE CLAUDIUS PERNET—The supreme yellow rose of today. Perfectly formed flower, deep lemon yellow without spot or blemish.

ULRICH BRUNNER—Cherry red, immense double. A leader of June roses.

Pink Radiance

Troy Nurseries' Climbing Roses

ALL HEAVY STRONG GROWING FREE BLOOMING VARIETIES

If your yard is small and you cannot afford the space for bush roses you still have the opportunity of enjoying beautiful roses by planting climbing varieties. These only need a foothold along the fence or at the side of the porch. Their vigorous vining canes will cling to almost any trellis support. They are extravagant bloomers and their polished waxy foliage is beautiful the season through.

PRICES OF CLIMBING ROSES

60 cents each, two for \$1.15, 5 for \$2.50
All Troy Nurseries' Roses are heavy two year plants.

AMERICAN BEAUTY—The abundant bloom as lovely and as deeply pink as the bush form. Strong healthy foliage growth.

AMERICAN PILLAR—Brilliant carmine rose with distinct cream variegation and yellow stamens. Single flowers measure two to three inches across, arranged in mammoth, evenly rounded clusters.

AVIATEUR BLERIOT—Exquisite buds of saffron-yellow shaded apricot, opening to a lighter tone. Blooms in open clusters emitting an unusual magnolia fragrance.

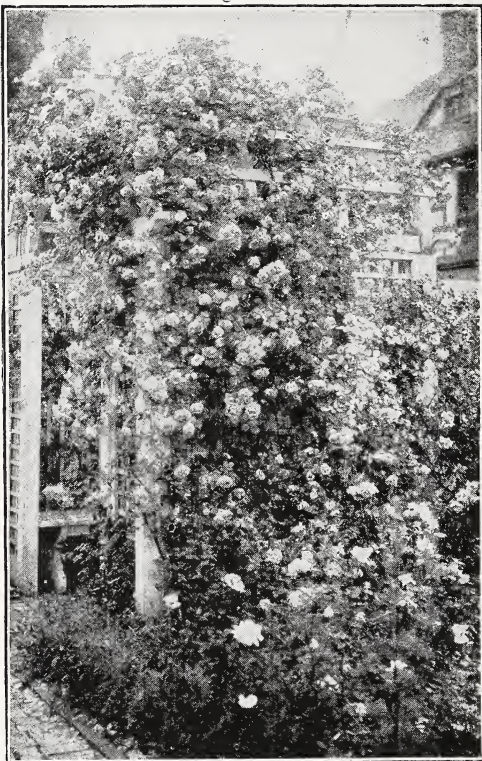

CRIMSON RAMBLER—The old favorite, with large heads of very gay, small, scarlet-crimson flowers.

DOCTOR VAN FLEET—A mass of beautiful clustered buds, which open out into large, shapely, solitary flowers, with stems 12 inches long. Delicate flesh pink.

DOROTHY PERKINS—The ideal pink rambler, flowers densely quilled and numerous, a beautiful shell pink. Excellent foliage.

GOLD FINCH—The semi-double flowers are borne in full clusters and are of a delightful lemon-yellow color. We consider it one of the finest of yellow roses.

PAUL'S SCARLET—This great new climbing rose stands out as one of the

Paul's Scarlet Climber

Dorothy Perkins

best for home planting. Color vivid scarlet, shaded crimson. The individual flowers hold their color longer than any other climbing rose, remain in bloom for weeks before they fade. Hardy everywhere.

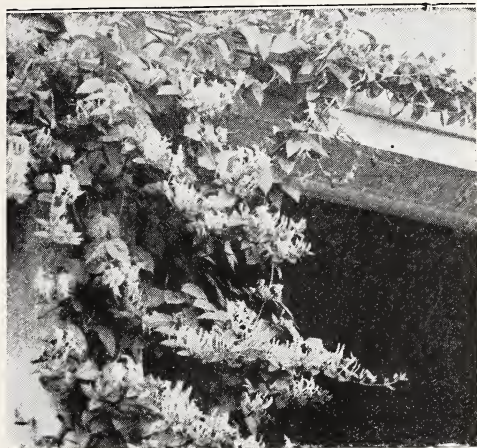

SILVER MOON—Blooms very large, four or more inches across, pure white, beautifully cupped, with thick clusters of yellow stamens.

PRIMROSE

A new hardy climbing yellow rose that we believe will surpass in popularity any variety as yet introduced. Full double unfading canary-yellow flowers produced in large clusters. We were able to secure only a very few of these from the introducer. Order early or you will be disappointed. \$2.50 each.

Troy Nurseries' Vines

These are the outside draperies that give a finished look to what would otherwise be bare columns and walls.

Hall's Japan Honeysuckle

BITTER SWEET—Glossy foliage and orange crimson fruit that clings all winter. 2 yr. plants 40c each.

BOSTON IVY—Clings firmly to the smoothest surface. 2 yr. plants 50c each.

CLEMATIS HENRYI — Large flowering white. \$1.00 each.

CLEMATIS JACKMANII—Large flowering violet purple. 2 yr. plants, \$1.00 each.

CLEMATIS MAD. ED. ANDRE—Large flowering, red 2 yr. plants \$1.00 each.

CLEMATIS PANICULATA—Small white fragrant flowers borne in clusters in profusion in September, followed by silvery, feathery seed pods, which make a very attractive appearance. Fine for porch shade. 2 yr. plants 40c each.

HONEYSUCKLE HALL'S JAPAN—Fine for shading porches and for covering fences and steep slopes. Flowers yellow, 35c each.

HONEYSUCKLE SCARLET EVER-BLOOMING—Not such a fast growing vine as Hall's Japan, but a continuous bloomer. Has scarlet trumpet shaped flowers two inches long borne in clusters. 50c each.

Hardy Phlox

Of the hardy flowering plants none is more easily grown than Phlox, nor is there any that is a more profuse bloomer. They begin blooming about the first of July and continue their brilliant display throughout the rest of the summer months.

Our varieties include every desirable color.

Prices, 20c each, three for 50c, 10 of one variety, \$1.50.

ATHIS—Salmon pink.

BEACON—Brilliant Cherry Red.

BERANGER—Flesh Pink.

ECLAIREUR—Red.

EUROPEA—White, red center.

INDEPENDENCE—White.

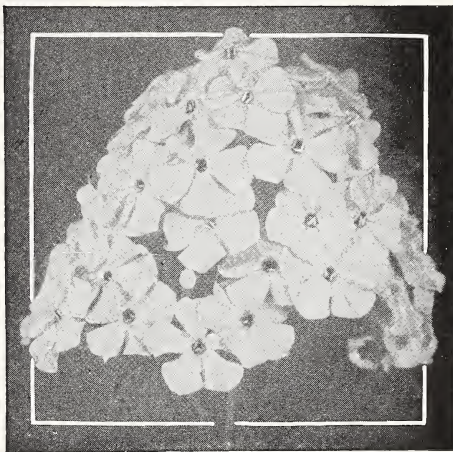

LA VOGUE—Silvery Rose.

PANTHEON—Deep pink.

PROF. VIRCHOW—Carmine.

R. P. STRUTHERS—Rich Carmine.

THOR—Salmon Pink.

Hardy Phlox

Troy Nurseries' Shade Trees

Plant Troy Nurseries' Shade Trees about your home and enjoy summer comfort; they shut out stifling heat. Is your home livable during the scorching months of summer? Is it cool and enjoyable? Or is it at the mercy of the relentless sun's rays pouring down upon it and all but suffocating your family with sweltering heat? You can stop this suffering from stifling sun heat by planting Troy Nurseries' Shade Trees about the home. Select with care the location in which each tree is planted. It should set so that when it has developed it will break the rays of the sun and shade the home.

BIRCH AMERICAN WHITE—Upright, smooth white bark, handsome green foliage. Use as lawn specimen. 6 to 8 ft. \$2.00, 8 to 10 ft. \$2.50.

BIRCH CUT LEAF WEEPING — Of slender vigorous growth, with graceful

drooping branches, silvery white bark and delicately cut foliage. Presents a very attractive appearance. Plant as single lawn specimen, in pairs on each side of walks or driveways, or in groups. 5 to 6 ft. \$2.50, 6 to 8 ft. \$3.00.

CATALPA BUNGEI—A perfect umbrella shaped tree with no pruning. Leaves large glossy heart-shaped, deep green, lying like shingles on a roof. Plant them along driveways, as sentinels to mark the corners of the lawn, or on each side of walks. 4 to 5 ft. heavy heads \$1.50, 5 to 6 ft. extra heavy heads, \$2.00.

CORNUS FLORIDA (White Flowering Dogwood)—Flowers white, 3 inches in diameter in spring before the leaves appear. Very showy and durable. Foliage greyish green, glossy. Plant among tall growing shrub backgrounds and corner groups to inject sparkling white bloom in spring and crimson foliage in fall. 3 to 4 ft. \$1.50.

CORNUS FLORIDA RUBRA (Red Flowering Dogwood)—Same as above except that the flowers are red. 3 to 4 ft. \$5.00.

CRAB BECHTEL'S DOUBLE FLOWERING—Many other varieties of flowering crabs are offered today, but this is the only genuine double flowering variety and the one that will please you. In May, when in bloom, the whole tree is covered with delicate pink, perfectly double, rose like flowers of delicious fragrance. Plant as individual specimens on the lawn. Never attains a height of over 15 feet, so can be used with telling effect in a small yard. 2 to 3 ft. \$1.00, 3 to 4 ft., \$1.25.

ELM AMERICAN — That noble native tree with graceful drooping branches and handsome foliage. Ideal for planting along wide avenues or as specimens in good size lawns. 8 to 10 ft. \$1.75, 10 to 12 ft. \$2.50.

MAPLE NORWAY—The one best tree. It naturally develops in a round headed, thickly limbed, clean looking tree. Its heavy foliage is of deep green and furnishes the densest shade. 8 to 10 ft. \$3.00, 10 to 12 ft. \$3.75.

MAPLE SILVER LEAF—A hardy, rapid growing beautiful native tree, which very quickly grows to shade producing proportions. Its leaves are large, deeply and irregularly cut, bright green above, silvery beneath, turning to bright yellow and bronze in full. We are starting to dig from a block of these this year that are as straight as gun barrels and have the most regular, well formed tops of any Maples we have ever seen. 6 to 8 ft. 75c, 8 to 10 ft. \$1.00, 10 to 12 ft. \$1.50.

MAPLE WEIR'S CUT LEAF—A rapid growing pyramid shape, with drooping branches and very beautifully dissected foliage. Plant as lawn specimens and you will be greatly surprised at their rich beauty. 6 to 8 ft. \$2.00.

MOUNTAIN ASH EUROPEAN — A splendid broad topped small tree, distinctly beautiful as a lawn specimen. Foliage

richly dark and lustrous. From late summer far into the winter its greatest attractiveness centers in its dense fruit clusters that gleam brilliantly orange-red against the green leaves or brown branches. 6 to 8 ft. \$1.50.

MULBERRY WEeping — The most graceful weeping tree. Forms a perfect tent shaped head, with slender leaf studded branches drooping to the ground. Admirably adapted for specimens on the lawn or cemetery planting. 2 yr. head 5 ft. trees, \$3.00.

PEACH PINK FLOWERING—A beautiful dwarf growing tree; at its blossom time in May every twig and branch bright with wonderfully formed flowers. Very attractive when planted as individual lawn specimens. 3 to 4 ft. 75c.

PEACH RED FLOWERING— A mate of above with red flowers. 3 to 4 ft. 75c.

POPLAR LOMBARDY—A quick growing hardy poplar, with limbs to the ground that is much used for background screening or raising the skyline. 6 to 8 ft. 60c, 8 to 10 ft. \$1.00.

THORN PAUL'S SCARLET—Handsome dwarf tree with shining leaves of attractive shape and color. Blooms profusely in late spring producing deep crimson-scarlet clusters of very double rose like flowers, followed by large red fruit in autumn. 3 to 4 ft. \$2.00.

WILLOW WEeping — Its beautiful arching branches are covered with airy bright green foliage. Becoming very popular as a lawn tree. 6 to 8 ft. \$1.50, 8 to 10 ft. \$2.00.

Maple Silver Leaf

Troy Nurseries' Hardy Garden Perennials

They require very little care and bloom year after year.

Prices of all Perennials, 20c each, 3 of one variety 50c, 10 of one variety, \$1.50.

CAMPANULA (Cup and Saucer Canterbury Bells)—Can supply Blue, Pink or White.

CATANANCHE CAERULEA—2 ft. July and August. Deep Blue flowers on long stems.

CENTURAE MONTANA—2 ft. Large Violet-blue flowers. July to September.

CERASTIUM TOMENTOSUM—Ground cover plant. Silvery foliage. Snow white flowers.

Anemone

COREOPSIS GRANDIFLORA—3 ft. Extra large Yellow flowers all summer.

SHASTA DAISY ALASKA—2 ft. A very fine strain that produces remarkably large flowers.

DELPHINIUM BELLADONNA—3 ft. Long spikes of most delicate Turquoise Blue flowers.

DELPHINIUM BELLAMOSA—3 ft. Dark Blue.

DELPHINIUM GOLD MEDAL HYBRIDS—Don't order less than 10 and get an assortment of colors ranging from lightest Blue to dark Purple.

DIANTHUS BARBATUS (Sweet William)—Phlox like flowers. Can supply Pink, Scarlet, Velvety Maroon.

DIANTHUS PLUMARIUS (Garden Pinks)—Spicy, fragrant flowers.

Golden Glow

Sedum

DIGITALIS MIXED (Foxglove)—3 ft. Order a half dozen and you will get Purple, Pink and White.

FUNKIA SUBCORDATA—(August Day Lily)—Valued as much for its heavy foliage as for its White, lily shaped, fragrant flowers in September.

GAILLARDIA GRANDIFLORA—2 ft. Flowers through the season deep maroon center thickly bordered with petals of Orange and Yellow.

GOLDEN GLOW—5 ft. Dahlia-like golden Yellow flowers. Early summer until frost.

GEUM MRS. BRADSHAW—18 inches. Carnation shaped Crimson Scarlet flowers from June to September.

GYPSOPHILA PANICULATA (Baby's Breath)—2½ ft. In mid-summer a fleecy mass of White in loose panicles of minute flowers.

GYPSOPHILA REPENS — A trailing plant with clouds of small White and Pink flowers in July.

HESPERIS (Sweet Rocket)—3 ft. Stout bushy plant with showy terminal spikes of Pink flowers in June.

LATHRUS LATIFOLIA—Hardy Vining Sweet Pea.

LIATRIS (Gay Feather)—Unique, mid-summer flowers showing a blaze of light Rosy Purple from tip to base of each feathery stock.

LINUM PERENNE — Blue Flowering Flax.

LUPINUS POLYPHYLLUS—Long Pink flower spikes on 2 ft. stems.

LYCHNIS CHALCEDONICA (Maltese Cross)—2½ ft. Bright Red flowers arranged in large flat panicles.

LYTHRUM ROSEUM—3 ft. Pink flowers in long arching spikes.

MONARDA—2 ft. Bushy, heavy leaved plants covered with round, full heads of Red flowers. Known as Bergamot.

MYOSOTIS PALASTRIS — The true hardy Forget-me-Not.

PANSIES MIXED—A great variety of colors.

PENSTEMON—2 ft. A rockery plant of long blooming period; flowers resemble pink Foxglove.

PHYSALIS (Lantern Plant)—2 ft. Produces freely its Orange Scarlet lantern like fruits.

RANUNCULUS—Buttercup.

STATICE LATIFOLIA—18 inches. Clump of thick leathery foliage, immense panicles of delicate Blue flowers.

SEDUM BRILLIANT— Handsome rubbery leaved plant surmounted by massive flat cymes of Crimson flowers.

SEDUM SPECTABILIS— Rose colored flowers.

THALICTRUM DIPTEROCARPUM — 4 ft. Dainty lilac flowers brightened by yellow stamens.

TRITOMA (Red Hot Poker)—Rush-like foliage, supporting smooth, thick flower stalk with a fiery cone at top.

TUNICA SAXIFRAGA—Tufted plant with light Pink flowers all summer.

VALERIANA OFFICINALIS — Hardy Garden Heliotrope.

Tritoma

Troy Nurseries' Apples

Grown in Your Own Orchard They Sun Ripen to their Highest Perfection Right on the Trees.

Troy Nurseries' Apple Trees are the best that you can get. They are full of vigorous life and will quickly grow to fruiting size.

Our careful system of dividing and marking varieties insures against mistakes, and our thorough packing guards against every exposure.

PRICES OF ALL APPLE TREES

Thrifty, 2 year old trees, 5 to 7 ft. high, 70c each; 2 of a variety, \$1.35; 5 trees, your selection of varieties, \$3.25; 10 trees, your selection of varieties, \$6.00.

BALDWIN — Large, bright red, with crisp, juicy, slightly tart, richly flavored flesh. Should be in every orchard. Winter.

BELLFLOWER—A good yellow winter variety.

DELICIOUS — Large, uniform, oblong, fine grained, mild, melting, with a most delicious aroma. Winter.

DUCHESS—Roundish, streaked red and yellow, flesh white, juicy, sprightly flavored. Fine fall cooking variety.

EARLY HARVEST—Pale yellow, fine flavored, early summer apple.

GRIMES GOLDEN—Rich golden yellow; fall variety so highly prized by all.

JONATHAN—Brilliant red, flesh white, fine grained, juicy, tender and delightfully flavored. None better through November and December.

MAIDEN BLUSH—The best late summer and early fall cooking apple. Yellow with blush cheek.

NORTHERN SPY—Large striped, mild sub-acid and tender, flavor very rich. Winter.

Grimes Golden

NORTHWESTERN GREENINGS — Large yellow; late keeper, holding well in common storage until spring.

RAMBO— This old favorite is just as worthy of a place in your orchard today as in the orchards of fifty years ago. Medium size, striped. Fall.

ROME BEAUTY—Large yellow and red, tender, juicy, excellent late keeper.

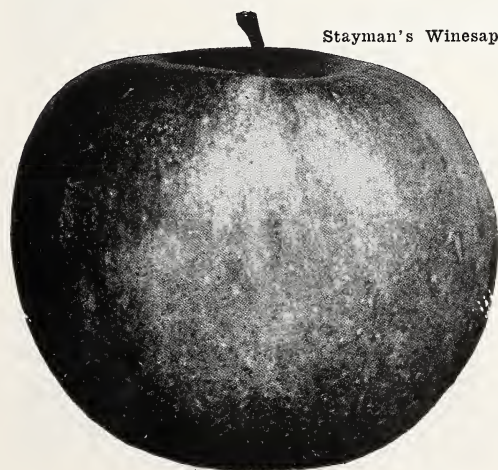

STAYMAN'S WINESAP—Dark red, one of the best in flavor, appearance and juiciness. Winter.

TALMAN SWEET—Yellow and Red. One of the best for baking.

WEALTHY — Deep red, flesh white, juicy and vinous. Late fall.

WINESAP—Deep red, productive, excellent quality, crisp and juicy, sub-acid. Winter.

YELLOW TRANSPARENT—The best early summer apple. White, tender, juicy, sprightly, sub-acid. Bears very young.

Stayman's Winesap

Superb Apricots

Luscious mid-summer fruit that ripens between Cherries and Peaches, and are adaptable to many and varied table uses.

Nice, well rooted trees, \$1.00 each.

Exquisitely Flavored Peaches

FOR EATING FROM THE TREES AND CANNING

If the housewife is to serve well rounded out meals she must be provided with a generous supply of fruits and berries. This can best be done by planting them in your own door yard.

During the fruiting season fresh sun ripened fruit should be served with all meals. Then there are the long winter months to think of. There should always be enough planted so that it is possible to have a well filled cellar and pantry.

The juicy, fresh tasting, tempting flavor of a home grown peach cannot be copied at the grocery, because it is fully sun-ripened on the tree, where Mother Nature intended it should be, and of course reaches its highest degree of perfection.

Troy Nurseries' Peach Trees are grown and cared for so carefully that you can depend upon their quickly growing to fruiting age.

Lemon Free

ELBERTA—The leading market variety. Large yellow, with red cheek. Flesh yellow, firm, juicy, of high quality. Very prolific. September.

GOLD DROP—Medium size, very productive. Has transparent, golden appearance. A good variety for the home orchard. Late September.

J. H. HALE—Beautiful golden yellow with deep carmine blush. Flesh firm and of best quality. September.

LEMON FREE—Lemon shaped and colored. Large, immensely productive, one of the best for canning. Late September.

ROCHESTER—A very early yellow free stone of extraordinary sweetness. Fruit large yellow, sweet, juicy, and of delicious flavor. Early August.

PRICES OF ALL PEACHES

Stocky, well rooted 4 to 5 ft. trees, 40c each; 2 of a variety, 75c; 5 trees, your selection of varieties, \$1.75; 10 trees, your selection of varieties, \$3.25.

BANNER—Large deep yellow, crimson cheek. Flesh yellow, excellent quality, rich, firm. Late September.

BELLE OF GEORGIA — Very large, skin white with red cheek; flesh white, firm, juicy. Early September.

CARMEN—Pale yellow with deep blush. Tender and juicy fine flavor. Best August peach.

CHAMPION—Cream white, red cheek; sweet, rich, juicy. August.

CRAWFORD EARLY—A magnificent yellow and red peach. Flesh deep yellow. Early September.

CRAWFORD LATE—A superb late yellow peach. Late September.

EARLY ELBERTA — Ripens about a week earlier than Elberta. Of equal quality and size.

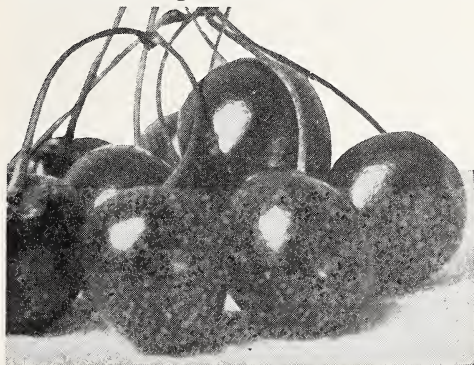

Carmen Peach

Choice Cherry Trees

The Cherry Trees you plant this year retain their usefulness throughout the distant tomorrows. They become a heritage to your children and will be treasured long after you are gone.

The fine quality of Troy Nurseries' Cherry Trees makes them overwhelming favorites everywhere. Year after year they will produce great big meaty cherries full of the richest goodness.

Black Tartarian

CHERRY TREE PRICES

Heavy, 5 to 6 ft. trees at \$1.00 each; 2 of a variety, \$1.95; 5 trees, your selection of varieties, \$4.75; 10 trees, your selection of varieties, \$9.00.

SOUR VARIETIES

DYEHOUSE—Our earliest ripening variety. Plant it and you'll have your first cherry pie fully a week before your neighbors.

EARLY RICHMOND—A dependable variety that seldom misses a crop. Dark red, melting, juicy, sprightly, rich acid.

ENGLISH MORELLO — Blackish red, rich acid. Late ripening.

LARGE MONTMORENCY—The all year round cherry. A prime favorite the country over for canning for winter use. Large, firm, dark red, of most delicious flavor.

MAY DUKE—The flavor of this variety may be classed as half way between sweet and acid.

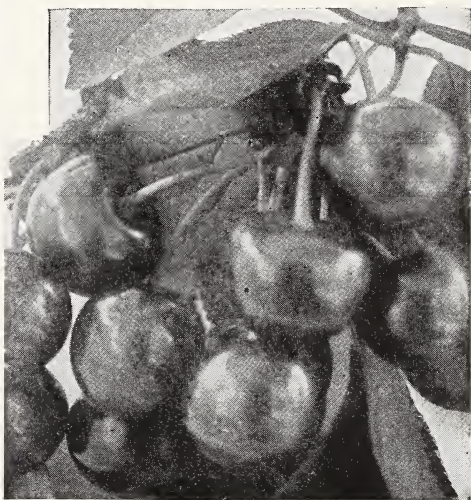

SWEET CHERRIES

BLACK TARTARIAN—A favorite everywhere. Very large, purplish black, solid flesh. We consider this the best black sweet cherry.

GOVERNOR WOOD—Large light red, juicy, rich, delicious.

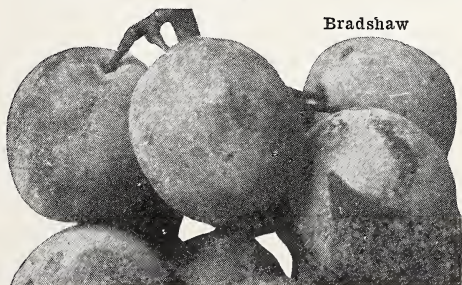

WINDSOR—Large, liver colored flesh, remarkably firm and good. Late ripening.

YELLOW SPANISH—Large yellow with red cheek. The most prolific bearer of all sweet varieties.

Early Richmond

Troy Nurseries' Plum Trees

Bradshaw

Bear Fruit of indescribable flavor and fairly bursting with goodness. Plant them in your own door yard, where the summer sun and fertile soil will grow them to their fullest perfection. Here the fruit can remain on the trees until it is the tenderest and most palatable. Canned, "plums sealed-in-goodness" become available to you every day of the year. They have a distinctive natural flavor beyond comparison that tempts the appetite and improves the health.

PLUM TREE PRICES

Unusually nice trees 5 to 7 ft. high, only 80c each; 2 of a variety, \$1.55; 5 trees, your selection of varieties, \$3.75.

BRADSHAW — Large, dark red, flesh green, juicy, productive.

BURBANK—Cherry red, large, very profitable market variety.

GERMAN PRUNE—Large, dark purple, sweet, good. One of the most popular for canning.

GREEN GAGE—Medium size, yellowish green. Its high quality of fruit makes it a standard by which others are judged.

LOMBARD — Violet red. Flesh yellow, juicy, pleasant and good. Excellent for home use and market.

REINE CLAUDE — Yellowish-green; flesh pale green, juicy and rich. Best of dessert sorts.

SHIPPER'S PRIDE—Large, dark purple; fine, juicy and sweet. Often measures two inches in diameter.

SHROPSHIRE DAMSON—Medium size dark blue, very productive.

Lombard Plum

YELLOW EGG — Large, yellow, egg shaped. Excellent for cooking.

Standard Pear Trees

Bartlett Pear

Any soil that will make a good garden or produce good grain will make a favored spot to plant Pear Trees. A strong rich loam is the best place for them, and their range of ripening is such that it is possible to have ripe Pears to eat from early August until late fall, and some varieties to lay in storage that will keep until late spring.

PRICES OF ALL PEAR TREES

Select trees, 5 to 7 ft. high only 90c each; 2 of a variety, \$1.75; 5, your selection of varieties, \$4.25.

BARTLETT—The favorite eating and canning pear. Richly flavored and a heavy bearer. Summer.

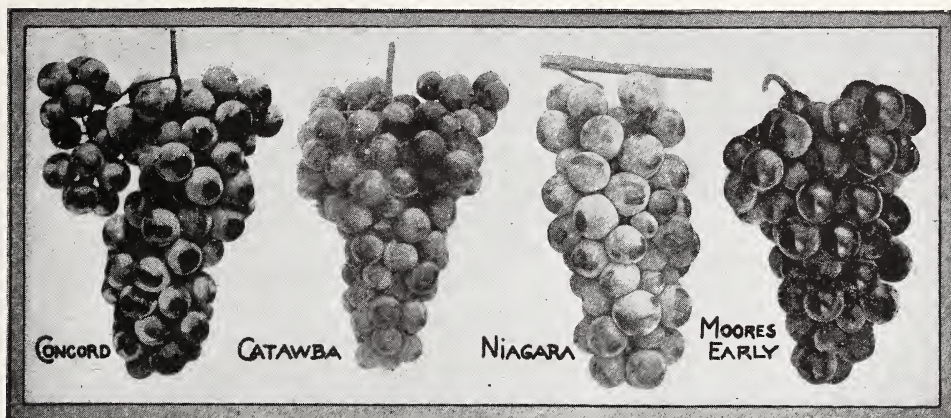

CLAPP'S FAVORITE — Large yellow and dull red, with russet specks, melting, rich. Summer.

DUCHESS—Large, buttery, rich, juicy, excellent. Autumn.

FLEMISH BEAUTY—Large juicy, rich. One of the hardiest and most popular. Autumn.

KIEFFER—Large, handsome, keeps remarkably well in storage. Autumn.

SECKEL—Rich yellowish brown when full ripe. Flesh smooth grained, sweet. Fine for dessert and pickling.

Home Arbor Grape Vines

To be absolutely certain of downright delicious grapes on every bunch you pick from your own arbor, plant Troy Nurseries' Vines. They are heavy two year selected stock, have long fibrous roots and sturdy tops.

Choice Grapes are full of vital food elements of highest importance to health—elements often deficient in modern diet.

Grapes can be developed to their finest perfection in your yard. Plant ten vines, six Black, two red and two white.

PRICES OF ALL GRAPES

Strong 2 year Vines, 25c each; 2 of a variety, 45c; 5 your selection of varieties, \$1.00.

AGAWAM—Large red berries, thick skin, sweet, aromatic. Long keeper after picking.

BRIGHTON—Produce large bunches of luscious red berries, a variety adaptable to almost any soil.

CATAWBA—Very late ripening red variety that is excellent for dessert.

CONCORD—The American Grape Juice Variety. Eaten from the vine they are the most wholesome and the richest in sugar. No other variety approaches the Concord

in delicately blended acids and aromatic flavors, so that the grape juice put up from them is especially good. Every bunch is completely filled with large, nearly black grapes. Do not leave them out of your planting.

DELAWARE—A favorite red dessert variety. Bunches small, very compact.

MOORE'S EARLY—Bunches of medium size, with large round, black berries, heavily covered with bloom. Very early.

NIAGARA—Home and market growers agree that this is the most valuable of the white grapes. When ripe they are fine; pale yellow, thin bloom. Flesh is slightly pulpy, tender, sweet, delightful.

WORDEN—A week earlier than Concord, equally as good. Black.

Quinces

Are table joys that everybody should have. They make wonderful jellies, and if combined with other fruits they awaken delightful flavors that cannot be brought out in any other way.

Heavy trees, 4 to 5 feet high, \$1.00 ea.

ORANGE—One of the best for cooking; a valuable, golden yellow Quince, widely planted; flesh firm, of good flavor. Bears abundantly.

CHAMPION—A prolific and constant bearer, fruit averaging larger than the Orange, more oval in shape, quality equally fine and a longer keeper. Bears extremely young; finest eating and cooking variety.

Downing Gooseberries

The one good gooseberry for all sections. Plant them three feet apart in good soil along the garden fence and give a good dressing of manure each season.

Thrifty Two Year Plants 25c each.

Currants

Hardy, easily cultivated, indispensable for Jellies and Jams.

Thrifty Two Year Plants, 25c each.

CERRY—Red.

FAY'S PROLIFIC—Red.

WILDER—Large red.

CHOICE RASPBERRY PLANTS

Troy Nurseries' Raspberry Plants are nice big thrifty plants. Plant them with the assurance that they will bear large crops of rich berries annually. Set in rows. Keep your raspberry patch well cultivated and free from weeds, and as soon as the plants are done bearing cut out the old canes to give more vigor to the young canes.

PRICES OF ALL RASPBERRIES

10 of a variety, 60c; 25 of a variety, \$1.00; 100 of a variety, \$3.50; 1000 plants, \$30.00.

CUTHBERT — Produce fine crops of large, conical, deep red berries, that are sweet, rich, highly flavored and as beautiful as strawberries.

CUMBERLAND—Leads all black cap raspberries in size, richness of flavor, firmness and freeness from seeds. The plant is the most vigorous grower and is an immense cropper. Having all these good qualities we feel that you will have better success with it than with any other variety and are offering only the one black cap variety.

Cumberland

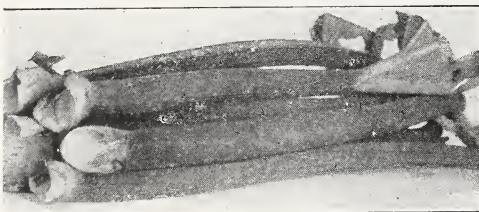

ST. REGIS EVERBEARING — Fruit commences to ripen with the earliest and continues on young canes until October. Berries bright crimson, large, rich, sugary, firm.

Rhubarb

GIANT VICTORIA CRIMSON

The quickest maturing, mildest flavored Pie Plant. Fertilize well each spring with well rotted manure.

10c each; 6 for 50c, (6 plants will supply the average family) 100 for \$7.50.

Washington Asparagus

Every home with a garden, in the country or city, should have a good sized bed of asparagus. Nothing is easier to plant or care for, and its being among the first fruits of the garden makes it a universal favorite. In a commercial way the supply is always inadequate and the price high. Plant in rows, setting the roots 18 inches apart. Spread the roots out and plant with crown two inches below the surface of the ground. Top dress annually with well rotted manure.

The Washington is rust resistant and is the best variety for the production of fancy asparagus for the home and market. It stands ahead of all others in size, vigor, tenderness and quality.

10 heavy two year plants, 35c; 25 plants, 65c; 50 for \$1.20; 100 for \$2.00.

Strawberries

There are many varieties of Strawberries. but in offering the one spring bearing variety—TENNESSEE PROLIFIC—We are recommending to our customers a variety that surpasses all others in every way. It is a great big cropper, producing Rich, Red, Ripe. Luscious berries of the finest quality.

In all classes of fruit there is always one variety that is vastly superior to all others, one that combines all the desirable features and leaves out the faults. TENNESSEE PROLIFIC is this outstanding variety of the Strawberry family.

It is of the same shape, but much larger and richer colored and flavored than the Dunlap. We recommend it to you as the heaviest fruiting and best tasting Strawberry that you can plant.

PRICE

Thrifty, well rooted plants, 65c per 25; \$1.25 per 100; \$8.50 per 1000.

MASTODON EVERBEARING—Outranks all predecessors, immense size, incredible cropper, of choice quality, and the strongest everbearing grower yet developed.

12 plants, 75c; 25 plants, \$1.25; 50 plants, \$2.00; 100 plants, \$3.50.

Eldorado Blackberries

75c per dozen; \$1.25 per 25; \$5.00 per 100.

The Best for Everybody Everywhere.

Grow them in your own garden, where you can pick them as they reach their highest perfection. The berries are large, jet black, borne in large clusters. They are sweet, have no core, and will keep well after picking.
